Creation of Woman and Man

When God first created woman and man, it was in the armpit that he placed the vagina and penis. God discovered that there was no respect in this at all because woman and man were able from the outside to have sex in public. If they just threw their arms around each other's neck, man's penis pushed out and entered at the vagina of the woman. They had sex easily. So God changed this and put the vagina and penis at the crotch. He said "You can still have sex, try it." So they got naked and lay on the ground before they were able to have sex. God said okay, this way it is certainly better. This is the reason why the vagina and penis are located at the crotch today.

It is also the reason why hair grows on the armpit. It grows there because God did not collect and remove it.
